STATEWIDE COMMUNITY INFRASTRUCTURE PROGRAM (SCIP)

The SCIP program was created in 2003 to provide California's local governments with an effective economic development tool for the financing of public infrastructure and development impact fees.

Can SCIP help your community?

- ✓ **Do you have commercial, industrial and/or residential projects that need to finance impact fees or other public infrastructure?**
- ✓ **Are you looking for an alternative to impact fee deferral programs?**
- ✓ **Will offering an efficient and cost-effective infrastructure financing program create more economic development opportunities within your community?**

If you answered "yes" to any of these questions, SCIP may be a tool that can help your community.

For more information you may visit <http://cscda.org/Infrastructure-Finance-Programs> or contact James Hamill at (925) 476-5644 or Jon Penkower at (925) 476-5887.

CSCDA was created by and for local governments in California and is sponsored by the California State Association of Counties and the League of California Cities. Currently, more than 500 cities, counties and special districts have become Program Participants to CSCDA - which serves as their conduit issuer and provides access to an efficient mechanism to finance locally-approved projects. CSCDA helps local governments build infrastructure, provide affordable housing, create jobs, make access available to quality healthcare and education, and more. CSCDA is a valuable resource to League of California Cities members.
